To: Dan Garcia, Prescott National Forest

From: Steve Sams, National Wild Turkey Federation

Subject: Final Report for Powerline Meadow and Tank Restoration Project. Agreement No. 13-PA-11030905

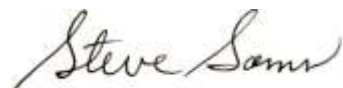

All work specified to be completed by the National Wild Turkey Federation (NWTF) under the agreement has been completed with the exception of the installation of the interpretive sign. The restoration of the dam and cleaning of Powerline tank by the Prescott National Forest has not been scheduled.

Project Summary

The work completed by NWTF and its partners, Arizona Game and Fish Department, Mule Deer Foundation, Arizona Sportsmen For Wildlife Conservation, and Arizona Public Service included removal of the old wire fence; demolition of the old wooden corral and piling for burning by the Forest Service; Construction of 3 rail welded pipe fence on the northern portion of the 13 acre meadow and along roadway access points; installation of a metal gate for utility access; and construction of a four wire fence around the remaining portion of the meadow. The pipe fence was constructed with materials provided by the Forest Service. All other fencing materials were provided by the NWTF and their partners. Labor was provided by NWTF and Mule Deer Foundation.

Prescott National Forest personnel cleared trees that were encroaching into the meadow. Youth Conservation Crews constructed the rock gabion erosion control structures.

A sign explaining the benefits of the project and the partnership will be installed at the SW end of the meadow between the new fence and the road.

A handwritten signature in cursive script that reads "Steve Sams".

Wording for sign to be installed at Powerline Meadow

POWERLINE MEADOW

WILDLIFE RESTORATION PROJECT

This 17 acre meadow is being restored through a cooperative effort by the Conservation Organizations, industry and the Prescott National Forest.

By excluding livestock and motor vehicle use, controlling soil erosion, removing trees encroaching into the meadow, and repairing and cleaning the tank, this meadow will provide important habitat for a wide variety of wildlife.

Please help protect Arizona's Meadows
